Qalyubia, Egypt

Summary

Creative and detail-oriented Frontend Developer with proven experience in building responsive, accessible, and high-performance web applications. Proficient in React.js, Redux Toolkit, TypeScript, and modern UI libraries. Strong track record of delivering user-centric, scalable solutions in cross-functional Agile teams, with a focus on clean, maintainable code and performance optimization.

Work Experience

Frontend Developer

Jun 2025 - Jul 2025

[Xjaffan](#) | Germany (Remotely)

Contributed to 3 production-level projects as a Frontend Developer at Xjaffan startup, using React.js and modern web technologies. Delivered responsive UIs, collaborated in Agile teams, and implemented scalable components under tight deadlines before company operations paused due to legal issues.

- Built 25+ reusable components in React.js, reducing future development time by 40%.
- Collaborated in a remote Agile team using Git and Trello over a 4-week sprint
- Designed 10+ responsive pages using CSS Grid, Flexbox, and SASS, tested across 5 screen sizes.
- Reduced initial page load time by ~25% through component optimization and lazy loading.

Projects

E-commerce Website

- Achieved 100% mobile responsiveness tested across 6 screen sizes.
- Built modular architecture with 30+ components for scalable feature addition.
- Delivered cart functionality and product filters that handled 50+ products dynamically.

Xjaffan Company Website

- Developed 5+ responsive pages, integrated 3 Lottie JSON animations to enhance visual engagement.
- Structured components for easy handoff to other developers, reducing onboarding time by an estimated 40% for future contributors

Skoonity – School ERP System

- Developed core UI modules (login, dashboard, records) used by 3 types of user roles.
- Implemented form validation and dynamic rendering for 20+ input fields.

White Heart – Donation Platform

- Created +3 animated cards components with React Context API ensuring code reuse across multiple sections.
- made +4 CSS animations with SVG components enhancing visual engagement.

Core Skills

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3, SASS, SQL

Frameworks & Libraries: React.js, Redux Toolkit, Vite, Bootstrap, Tailwind CSS

Technical Skills: DOM Manipulation, RESTful APIs, Component-Based Architecture, Debugging & Troubleshooting

Tools & Platforms: Git, GitHub, Firebase, Firestore, XAMPP

Education

Aug 2022 - Aug 2026

Banha University

Bachelor of Computer Science

Minor: Scientific Member at IEEE BUB, 2023 – Present

GPA: 3.6
